

Management Services:

- There are expert teams available that help you manage and operate your cloud environment.

**Develop
application-
specific health
monitoring using
CloudWatch.**

Managed services can increase your operational efficiency by helping you develop application-specific health monitoring using CloudWatch.

Professional Services

Professional Services helps enterprise customers move to a cloud-based operating model.

Implements solutions

Professional Services

**Get help with
evaluating an
application for
migration to the
cloud.**

You can quickly move on-premises applications to the cloud using AWS Professional Services.

AWS Partner Network (APN)

APN is a global community of approved partners that offer software solutions and consulting services for AWS.

Offers **technology** partners that provide **software solutions**

Provides **consulting** partners that offer **professional services**

APN

Find **approved vendors** with deep AWS expertise

You need help designing and building a new application.

If your team lacks the technical expertise to build and deploy cloud applications, the **APN** could help you get up and running quickly.

Marketplace

Marketplace is a digital catalog of prebuilt solutions you can purchase or license. You may also sell your own solutions to others via Marketplace.

Buy third-party software

Sell solutions to AWS customers

Search the catalog of software listings and install with the click of a button

Marketplace

Try out an application before making a long-term commitment.

Some products listed on **Marketplace** offer free trials. The free trial allows you to try the software before you buy it.

I use Marketplace a lot to find datasets for my machine learning projects.

Personal Health Dashboard

Personal Health Dashboard alerts you to events that might impact your AWS environment.

Provides
troubleshooting
guidance

Feedback tailored to
your **specific**
environment

Things to Remember when Studying for the Exam
